Description and Functional Requirements

Text-Based Story Game

To survive, you must differentiate between other humans and AI

3 Main Features

1. Human-written lines and AI-generated lines

2. Energy-saving option to turn off any additional AI-generation and use our pre-set AI-generated lines

3. At the end of the game, you will see the results of the choice you made

System Structure and Technologies

Game Engine: Unity

Language: C#

System Structure:

- Game Engine
- Scripts
- Game Objects
- Components
